Costa del Sol, Mijas Pueblo

new development of exclusive homes that combine design, innovation, the latest technology and respect for the environment with the use of alternative energy and sustainable materials, with the Breeam and Well seals that certify the highest quality standards. The promotion will be made up of 19 three-bedroom homes with more than 4,000 square meters of green landscaped areas with plants and trees native to the area, on a plot of 8,654 square meters.

new development of exclusive homes that combine design, innovation, the latest technology and respect for the environment with the use of alternative energy and sustainable materials, with the Breeam and Well seals that certify the highest quality standards.

The future 16+ homes will feature the use of coatings and finishes that are respectful of the environment and the health of its occupants and a large outdoor seating area. They will also include lifts and energy-efficient appliances, reduction in water and energy consumption, low-emission community heating and landscaped areas with native plants with very low water resources, among other advantages.

All rooms will be designed to open onto the terrace, surrounded by light and nature. The interior and exterior areas will be fully connected, thus achieving a seamless transition.

Each residence will have 130 square meters, penthouses with a 130 square meter solarium with Jacuzzi and will respect the environment with the renovation of green areas.
